“

An extremely pleasant and positive experience with the clinician and the doctor. They both took time to understand my lifestyle, issues and concerns and suggested some very simple and practical advice. ”

380 BNP Paribas employees opted in for a health screen for their partner in 2024.

# Which health screening is right for your partner?

Our range of reAssure health screenings focus on prevention for key health indicators, including cardiovascular disease and cancer, as well as men's and women's health. Your partner will be provided with their own personalised screening report which will contain expert advice on lifestyle and how to improve their long-term health.

If your partner cannot attend our clinics in person, we will send them some home test kits to accompany a video consultation with the GP.

Your partner can also choose to add on the genetic screening test, Invitae. This is a saliva test that determines the risk of developing a range of medical conditions including the common cancers and cardiovascular disease.
